For accuracy and best results measure your foot length.

1) Step down on a piece of paper in stocking feet and trace the outline of your foot (if you have trouble touching your toes have a friend trace your foot for you)

2) Use a ruler to measure the length of your foot from the longest toe to the back of your heel and record your measurement

Use the ruler to measure the widest part of the foot and record your measurement

3) Fit the foot in-between the two lines of your foot pattern piece (B)

Or record the inches and look for a shoe conversation size chart for your common shoe sizes.
